Introduction

Informatics graduate from Universitas Syiah Kuala with a GPA of 3.74/4.0, specializing in software engineering with a focus on web and mobile application development. Demonstrated hands-on experience across full-stack development, DevOps, and system automation through internships, laboratory assistant roles, and independent projects. Proven ability to lead teams and deliver end-to-end solutions, with a strong commitment to continuous learning and meaningful contribution to the tech industry.

Education

Syiah Kuala University	2021 – 2025
• Bachelor of Informatics – GPA: 3.74/4.0	
MAN 1 Banda Aceh	2018 – 2021
• Mathematics and Natural Sciences	

Experience

Lembaga Penelitian dan Pengabdian kepada Masyarakat (LPPM) Syiah Kuala University

IT Staff	Aug 2025 – Present
- Managed and maintained the university research publication portal publications.usk.ac.id, ensuring system stability, uptime, and performance for hundreds of active journal submissions. - Diagnosed and resolved critical server errors on the publication platform, minimizing downtime and restoring services efficiently. - Led the data migration process from the legacy journal platform jurnal.usk.ac.id to the new publications portal, ensuring data integrity and continuity. - Provided technical support for digital systems and platforms used by research and community service units. - Collaborated with academic and administrative staff to resolve IT issues efficiently.	

Badan Meteorologi, Klimatologi, dan Geofisika (BMKG) Aceh Besar

Full Stack Developer Intern	Jun 2024 – Jul 2024
- Developed and maintained a web-based employee leave request system, enabling efficient leave applications, real-time leave balance tracking, and automated approval letter generation. - Implemented full-stack features using React.js, Tailwind CSS, Express.js, and MySQL, covering both UI components and RESTful API endpoints. - Collaborated closely with team members to optimize workflows and improve the user experience for both employees and administrators.	

Bangkit Academy 2024 by Google, GoTo, Tokopedia, Traveloka – Android Learning Path

Independent Study Participant at Kampus Merdeka, Remote	Feb 2024 – Jun 2024
- Completed structured Android development modules on Dicoding Academy, engaging with expert mentors through discussion forums to deepen technical understanding. - Conducted regular mentoring sessions to address challenges and maintain steady progress throughout the program. - Collaborated in a cross-functional team to deliver a final capstone project aligned with mentor-approved objectives.	

Informatics Student Association, Syiah Kuala University

Head of Student Welfare Management Department

Feb 2024 – Jan 2025

- Directed and supervised the execution of strategic departmental programs aimed at improving student welfare.
- Initiated and developed innovative programs in close collaboration with the deputy head and secretary.
- Fostered a harmonious and productive working environment, encouraging collaboration and motivation among staff.

Staff of Student Welfare Management Department

Feb 2023 – Jan 2024

- Assisted in implementing departmental programs focused on enhancing student well-being and engagement.
- Contributed to the planning of new initiatives by supporting research, documentation, and internal communication.
- Promoted a supportive and inclusive team culture by maintaining collaboration and professionalism in daily tasks.

Syiah Kuala University

Laboratory Assistant – DevOps Class

Jul 2024 – Dec 2024

- Guided students in implementing CI/CD (Continuous Integration/Continuous Deployment) principles, deploying projects on DockerHub and Google Cloud Platform (GCP), and managing data backup through hands-on labs and evaluations.
- Provided constructive feedback and addressed student inquiries, strengthening their DevOps skills in automation, deployment, and infrastructure management.

Laboratory Assistant – Software Engineering Class

Feb 2024 – Jun 2024

- Instructed 41 students across 16 sessions on software development tools and methodologies, including Mendix, Figma, Trello, GitHub, GitKraken, StarUML, Xtensio, and Storyboard That.
- Evaluated all assignments, lab work, group projects, and Cornell notes, providing remedial sessions to ensure every student achieved a score of 100.

Laboratory Assistant – Web Programming Class

Feb 2024 – Jun 2024

- Educated 44 students across 16 sessions on Linux fundamentals and web programming, covering HTML, CSS, JavaScript, PHP, Laravel, Tailwind CSS, and Git.
- Designed and delivered structured lesson plans integrating practical exercises, collaborative projects, and dynamic lectures, published at docs-pbw-inf-224.vercel.app.

Projects

Ilmana Initiative – ilmanainitiative.com

- Developed a full-stack web platform for Ilmana Initiative, a social organization, featuring dynamic content management, responsive UI, and a RESTful API for seamless frontend-backend communication.
- Tools Used: React.js, Express.js, Node.js, MySQL, REST API

RWikiStat – Previously published on App Store

- Developed the iOS version of an interactive educational app for learning statistics, and maintained the existing Android and web platforms, featuring a discussion forum and in-app R code execution.
- Tools Used: React Native, Expo, Firebase

D'Event

- Built an interactive web application enabling campus organizations to register events, display schedules, and manage new event entries through an intuitive and responsive interface.
- Tools Used: Adonis.js, Tailwind CSS

MediGuide

- Implemented a medical chatbot Android application delivering a user-friendly and responsive experience with advanced conversational features for seamless medical assistance.

- Tools Used: Kotlin, Android Studio

Sistem Bimbingan Mahasiswa (SIMBIMA)

- Designed a Student Advising System featuring personalized counselling sessions, career resources, and communication tools for effective student-advisor interaction and progress tracking.
- Tools Used: Laravel, Tailwind CSS, D3.js

Forterzzz

- Developed an interactive team portfolio website delivering an engaging and fully responsive user experience.
- Tools Used: React.js, Tailwind CSS

Technologies

Languages: Bahasa Indonesia, English

Programming Languages: C, Java, JavaScript, Kotlin, PHP, Python, SQL, TypeScript

Frameworks & Libraries: Adonis.js, Express.js, Laravel, Next.js, Node.js, React.js, React Native, Tailwind CSS

Databases: MySQL, Firebase

Tools & Platforms: Amazon Web Services (AWS), Docker, Expo, Figma, Google Cloud Platform (GCP), Linux
